### INTERNSHIP

#### ■ Web Developer (CODSOFT)

I worked on projects like landing page, simple calculator page, portfolio page.

#### ■ UI/UX Designer (CODING SAMURAI)

I worked on project like cooking recipe application.

## ■ PROJECTS

- **Enhanced Student Performance Based Mobile Application-(JAVA|XML|ANDROID STUDIO).**

This project presents the development of a comprehensive college management app using Flutter, a cross-platform framework. Its primary goal is to address the diverse needs of educational institutions, such as attendance management, academic performance analysis, event management, faculty and student profiles, role-based access control, and cross-platform accessibility.

- **QR-CODE GENERATOR-(HTML|CSS|JAVASCRIPT|REACTJS|VISUAL STUDIO).**

This platform offers a user-friendly interface, allowing you to create QR codes for various purposes. Its standout feature is the ability to create QR codes in various sizes and make them visually appealing and on-brand.

- **Global Time Based Flutter Application-(FLUTTER|DART|ANDROID STUDIO).**

Global Clock is a feature-rich Flutter application that brings the world's time zones to your fingertips. Whether you're a global traveler, international business professional, or just curious about time around the globe, Global Clock provides a seamless and intuitive experience for staying connected with the world. Additional key features include day/night visualization, a user-friendly design, and dark mode support.

- **Cooking Recipe Based UI/UX design-(FIGMA|CANVA).**

This project focuses on user interface design, describing the application's design and outcomes that are easily identified by the user.

- **Portfolio Based Websites-(HTML|CSS|JAVASCRIPT|REACTJS|VISUAL STUDIO).**

This platform offers a user-friendly interface. Step into Digitalize, the ultimate platform for showcasing talents, skills, and achievements through personalized portfolio-based websites.
